Professional profile

Since 2023 I have been building native Android apps (Kotlin, Java, Jetpack Compose, KMP) and hybrid apps (Angular, Ionic, Capacitor) for clients such as BBVA, BNP Paribas, Volvo, EMT Valencia and the Valencian Regional Government. I have worked as Tech Lead at Laberit Sistemas and as Android Engineer – Team Lead at Fourvenues, where I defined architectures from scratch (Clean Architecture, MVVM, MVI), coordinated teams, delivered training sessions and built hardware integrations (Bluetooth, RFID/NFC, printers, tap-to-pay payments). I also work with AI applied to development: RAG systems and MCP servers with Claude. Today I run DolcePOS, my own product, combining engineering and business development.
